SUMMARY

MuleSoft Certified Integration Team Lead with 6+ years of experience specializing in API integration and microservices, delivering scalable solutions for fintech and enterprise IT. Proven track record in architecting digital lending platforms and leading cross-functional teams optimizing performance, and bridging business needs with technical execution. Passionate about continuous learning, mentoring, and building impactful solutions. environments.

PROFESSIONAL EXPERIENCE

Accenture

Integration Team Lead

Sep 2024–Present

- Led the successful migration of 380 MuleSoft APIs from Mule 4.4 to 4.9 and Java 8 to Java 17.
- Conducted comprehensive analysis of all APIs within 2 months, to develop a phased migration plan, classifying APIs into major and minor change categories.
- Upgraded POM files, runtime configurations, custom connectors, deprecated connectors (e.g., SAP RFC, Salesforce Get Session ID), along with updates to AMQ URLs, loggers, error handling, and Solace JCSMP properties.
- Migrated protocols from SMB to SFTP, ensuring security compliance and performance enhancements.
- Supervised a team of 10 developers, overseeing development, MUnit coverage, and code reviews, and prepared detailed unit testing documents for success and failure scenarios.
- Governed full project lifecycle: from L2, business, and ops sign-offs, external stakeholder communication, Dev/TST deployments, to CloudHub and Datadog log monitoring.
- Handled production activities: CR creation, CAB approvals, policy updates, logger contract changes, and final deployment to production with post-deployment monitoring.

IDFCFirstBank

SENIOR API DEVELOPER

Nov 2021- Aug 2024

Project 1: Digital Lending Platform (BNPL/Pay Later Service)

- Architected the loan onboarding process by developing and implementing architectural APIs for key stages such as identity verification, customer authenticity, loan creation, status checks, and loan disbursement, significantly improving onboarding efficiency and customer experience.
- Designed RAML specifications using Anypoint Platform and built MUnit test cases, enabling automated CI/CD workflows through Maven, Jenkins, Git, Elastic, Dynatrace, and AWS Cloud deployments via CloudHub and RTF.
- Achieved MuleSoft Certified Developer – Level 1 (MCD) certification, validating core integration expertise.
- Implemented advanced DataWeave transformations and centralized exception handling strategies, enhancing data processing performance and reliability.
- Developed custom Python scripts to automate repetitive tasks, improving operational efficiency and reducing manual effort.

Project 2: Migration and Integration Initiatives

- Led the migration of critical infrastructure components, including messaging systems from AMQ to Kafka and databases from MySQL to Oracle, ensuring seamless transitions with minimal downtime.
- Gained deep hands-on experience with Anypoint Platform components: API Manager, Runtime Manager, Design Center, Exchange, Connectors, and CloudHub/RTF, contributing to platform scalability and governance.
- Strengthened API security by implementing robust authentication and authorization protocols, including OAuth 2.0, aligning with enterprise compliance and data protection standards.

Technologies: Python, MuleSoft, Django REST, Flask, PyQt5, AWS, PostgreSQL, Docker

Tools: Postman, WinSCP, PuTTY, Anaconda, Visual Studio, Bitbucket, Git Bash, Jenkins

- Designed and maintained desktop applications using the PyQt5 framework, enhancing UI/UX and system functionality through continuous debugging and performance tuning.
- Developed and deployed machine learning models for outlier detection, automating manual anomaly detection processes and improving data accuracy and efficiency.
- Leveraged AWS, PostgreSQL, and Docker to build robust, scalable, and production-ready solutions for data processing and analytics.
- Designed and optimized REST APIs for business data storage, processing, and update operations using Python frameworks (Django REST, Flask) and libraries like Pandas, NumPy, JSON, and schema validation tools.
- Improved code quality, maintainability, and security through advanced coding practices, including the use of decorators, structured error handling, and data encryption techniques.
- Ensured seamless development, testing, and deployment workflows using tools like Postman, Jenkins, Git, Bitbucket, and Anaconda.

EDUCATION

GRADUATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

2014 - 2018

Dr. APJ Abdul Kalam University

Percentage: 75 (with Honors)

INTERMEDIATE

2013 - 2014

St. Francis College, Lucknow (ISC Board)

Percentage: 86

HIGH SCHOOL

2011 - 2012

St. Francis College, Lucknow (ICSE Board)

Percentage: 85

CERTIFICATES

Salesforce MuleSoft Certified Developer – Level 2 – 2025

Salesforce MuleSoft Certified Developer – Level 1 (Maintenance) – 2025

Salesforce AI Associate Certified – 2025

AWS Certified Cloud Practitioner – 2025

[AWS Certified Cloud Practitioner \(CLF-C02\) | View Certificate](#)

Python & Django Full Stack Web Developer Bootcamp (Udemy)

DevOps: CI/CD with Jenkins pipelines, Maven, Gradle (Udemy)

ADDITIONAL

PERSONAL SKILLS: Project Management, Organized, Time management, Team player, Fast learner

INTERESTS: Avid Chess player, Basketball and Table tennis, Reading, Swimming, Sketching, Fitness enthusiast
